

CYBERPRAHARI

Empirical threat intelligence synthesized from the Indian Cyber Crime Coordination Centre (I4C). Defending digital citizens through awareness, ethical design, and rapid response.

01

NO DIGITAL ARREST

Indian law has NO provision for arrest via video call. CBI, ED, or Police never interrogate online.

02

LOCK BIOMETRICS

Lock your Aadhaar biometrics via [mAadhaar app](#) to stop cloned silicone fingerprint withdrawals.

03

ZERO APK INSTALLS

Never install APK files sent via WhatsApp for bill updates or remote tools like AnyDesk / TeamViewer.

04

NO PREPAID TASKS

Legitimate employers never demand capital deposits to release wages or video-liking commissions.

05

DIAL 1930 FAST

Report financial fraud within 2 hours to activate bank fund freezes before cash is withdrawn at ATMs.

✓ ESSENTIAL CYBER SAFETY DO'S

Verify Financial Advisors: Check advisor registration exclusively on the official [sebi.gov.in](#) portal.

Family Safe Word: Establish a confidential verbal offline password to verify AI voice and video clone calls.

App-Based 2FA: Use Google or Microsoft Authenticator apps instead of SMS OTPs to block SIM swap attacks.

Masked Aadhaar: Use Masked Aadhaar (displaying only the last 4 digits) for all non-statutory KYC submissions.

✗ CRITICAL CYBER SAFETY DON'TS

Never Share OTP or UPI PIN: Entering your UPI PIN always DEBITS money from your account, never credits it.

Never Grant Blanket Permissions: Deny contacts, storage, and gallery permissions to instant loan utilities.

Never Transfer to "Verification Accounts": No government body maintains safe verification bank accounts.

Never Trust Sideloaded Apps: Avoid downloading enterprise iOS profiles or third-party APKs outside official app stores.
